### Extraction process

Refining is an extraction method that purifies oils by removing impurities and undesirable elements. It includes techniques such as degumming, neutralisation, bleaching, and deodorisation to enhance the quality, stability, and versatility of the oil for various applications.

### Skin Benefits

Carnauba (T3) Wax acts as a binding and thickening agent in cosmetic formulations. It provides structure and viscosity to products. Incorporate Carnauba (T3) Wax into your formulas for its beneficial properties.

### Hair Benefits

Carnauba (T3) Wax is a natural wax derived from the leaves of the carnauba palm. It is commonly used in hair care products for its emollient and protective properties. Carnauba Wax helps provide structure, hold, and shine to hairstyles without weighing down the hair. It can also create a protective barrier, sealing in moisture and reducing moisture loss. Incorporate Carnauba Wax into your hair care formulations for enhanced styling, moisture retention, and a glossy finish.

We encourage carrying out additional tests if necessary. The information is not to be disclosed to others, reproduced or transmitted in whole or in part without permission from O&3.

## Functionality

### Emollient

Softens and smooths the skin, creating a protective barrier that locks in moisture. It is particularly beneficial for dry, rough, and chapped skin, providing deep hydration and improving the skin's texture.
