Skin Benefits

Coffee Green Irradiated is a gentle exfoliant that is derived from green coffee beans and has been irradiated. It has an earthy and roasted aroma and a brown color. Coffee Green Irradiated is commonly used in exfoliating scrubs, body polishes, and soap making. The particles of Coffee Green Irradiated provide a gentle exfoliation, helping to remove dead skin cells and reveal smoother, Revitalised skin. The exfoliant stimulates circulation and can leave the skin looking refreshed and rejuvenated. It adds an earthy aroma to formulations, enhancing the sensory experience of exfoliating products.

Functionality

Exfoliating

Gently removes dead skin cells from the surface, promoting a smoother and more radiant complexion. It unclogs pores, reduces the appearance of blackheads and whiteheads, and enhances the skin's natural renewal process.

Hair Benefits

Coffee Green Irradiated can provide gentle exfoliation to the scalp, helping to remove buildup and promote a healthy scalp environment. Its exfoliating properties stimulate circulation and can leave the scalp feeling refreshed. Additionally, the earthy and roasted aroma of Coffee Green Irradiated adds a pleasant scent to hair care products. It can be incorporated into scalp scrubs, exfoliating shampoos, and scalp treatments to enhance the exfoliation process and promote scalp health.
