Extraction process

Refining is an extraction method that purifies oils by removing impurities and undesirable elements. It includes techniques such as degumming, neutralisation, bleaching, and deodorisation to enhance the quality, stability, and versatility of the oil for various applications.

Skin Benefits

Mango Butter carries a creamy and tropical aroma, derived from the fruit kernels of ripe mangoes. It has emollient and moisturising properties, nourishing and conditioning the skin, leaving it feeling soft and smooth. The butter is commonly used in body butters, lotions, balms, creams, soaps, and hair care products to provide hydration and enhance the skin's texture, promoting a healthy appearance.

Hair Benefits

Mango Butter can contribute to a nourishing and moisturising hair care routine. Its emollient properties can help improve the condition of the hair, reducing dryness and promoting overall hair health. Incorporating Mango Butter into hair butters, masks, and leave-in treatments can provide deep hydration and nourishment, leaving the hair feeling soft and manageable.

We encourage carrying out additional tests if necessary. The information is not to be disclosed to others, reproduced or transmitted in whole or in part without permission from O&3.

Functionality

Anti-Aging

Packed with antioxidants, it helps fight free radicals and reduce the signs of ageing. It promotes the production of collagen, improving skin elasticity and firmness, and diminishing the appearance of fine lines and wrinkles.

Emollient

Softens and smooths the skin, creating a protective barrier that locks in moisture. It is particularly beneficial for dry, rough, and chapped skin, providing deep hydration and improving the skin's texture.

Easily-Absorbed

Quickly absorbs into the skin without leaving a greasy residue. Lightweight and ensures fast penetration, delivering essential nutrients and hydration for a smooth and nourished complexion.

Moisturising & Hydrating

Deeply moisturising, helping to hydrate and nourish the skin and hair. It forms a protective barrier, preventing moisture loss and leaving the skin and hair feeling soft and supple.
