Colour Cream

Skin Benefits

Murumuru Butter has a rich and creamy texture, derived from the seeds of the Murumuru palm tree. It has moisturising and emollient properties, helping nourish and soften the skin. The butter is commonly used in body butters, lotions, and creams to provide hydration and protection, leaving the skin feeling smooth and hydrated.

Hair Benefits

Murumuru Butter can contribute to a moisturising and nourishing hair care routine. Its rich and creamy texture can help hydrate and soften the hair, reducing dryness and frizz. Incorporating Murumuru Butter into hair masks, conditioners, and styling products can provide deep moisture, improve manageability, and enhance the natural shine of the hair, leaving it feeling luxurious and replenished.

Functionality

Easily-Absorbed

Quickly absorbs into the skin without leaving a greasy residue. Lightweight and ensures fast penetration, delivering essential nutrients and hydration for a smooth and nourished complexion.

Emollient

Softens and smooths the skin, creating a protective barrier that locks in moisture. It is particularly beneficial for dry, rough, and chapped skin, providing deep hydration and improving the skin's texture.

Moisturising & Hydrating

Deeply moisturising, helping to hydrate and nourish the skin and hair. It forms a protective barrier, preventing moisture loss and leaving the skin and hair feeling soft and supple.
