Extraction process

Cold-pressed extraction is a method used to extract natural oils from various plant-based sources. It involves applying mechanical pressure to the source material without the use of heat or chemicals, resulting in a pure and unrefined oil.

Skin Benefits

Cold Pressed Organic Extra Virgin Olive Oil can be used in hair care products for its nourishing and conditioning properties. The oil's moisturising properties can help hydrate and soften the hair, reducing frizz and promoting smoother strands. It can be added to hair oils, serums, or leave-in treatments to provide nourishment and enhance the overall health and appearance of the hair.

Functionality

Anti-Aging

Packed with antioxidants, it helps fight free radicals and reduce the signs of ageing. It promotes the production of collagen, improving skin elasticity and firmness, and diminishing the appearance of fine lines and wrinkles.

Emollient

Softens and smooths the skin, creating a protective barrier that locks in moisture. It is particularly beneficial for dry, rough, and chapped skin, providing deep hydration and improving the skin's texture.

Skin Tightening

Promotes skin elasticity and firmness, reducing the appearance of wrinkles. It helps maintain a youthful and lifted look by supporting collagen production, giving the skin a tighter and more toned feel.

Hair Benefits

Olive Extra Virgin Oil, Cold Pressed Organic can provide multiple benefits for the hair and scalp. It is a natural emollient that can help moisturise and nourish the hair strands, promoting softness and shine. Olive oil has a high concentration of monounsaturated fatty acids, which can help strengthen and protect the hair from damage and breakage. It may also help to combat dryness and frizz, providing smoother and more manageable hair. Additionally, the oil can soothe the scalp, reduce itchiness, and potentially contribute to a healthier scalp environment for optimal hair growth. Using olive oil as a pre-shampoo treatment or incorporating it into hair care products can help improve the overall health and appearance of the hair. However, individuals with fine or thin hair may need to use it sparingly to avoid weighing down the hair.

Easily-Absorbed

Quickly absorbs into the skin without leaving a greasy residue. Lightweight and ensures fast penetration, delivering essential nutrients and hydration for a smooth and nourished complexion.

Moisturising & Hydrating

Deeply moisturising, helping to hydrate and nourish the skin and hair. It forms a protective barrier, preventing moisture loss and leaving the skin and hair feeling soft and supple.
