Allium Cepa Seed Oil

Manufacturing Method
Cold Pressed

CAS Number
Not Listed.

Origin
Europe
Poland

EINCS
Not Listed.

Scent
Characteristic, Spicy

Customs Tariff Code
1515 9040

Colour
Gold-Yellow, Light Yellow

Extraction process

Cold-pressed extraction is a method used to extract natural oils from various plant-based sources. It involves applying mechanical pressure to the source material without the use of heat or chemicals, resulting in a pure and unrefined oil.

Skin Benefits

Cold Pressed Onion Seed Oil is known for its nourishing and stimulating properties, making it beneficial for hair care formulations. It can help nourish the hair and scalp, promote hair health and growth, and improve the overall appearance and texture of the hair. Cold Pressed Onion Seed Oil is commonly used in hair oils, serums, or masks to provide intensive care and support for various hair concerns.

Hair Benefits

Cold Pressed Onion Seed Oil can be used directly on the hair and scalp to provide nourishment and stimulate hair growth. The oil's stimulating properties can help improve blood circulation in the scalp, leading to healthier hair follicles. Cold Pressed Onion Seed Oil can be used as a scalp treatment, added to hair oils or masks, or incorporated into hair care products to promote hair health, improve texture, and add shine. While not primarily known for its specific scalp benefits, Cold Pressed Onion Seed Oil's overall nourishing and stimulating properties can indirectly support scalp health by providing essential nutrients and promoting a balanced scalp environment.

Functionality

The attached information is considered to be correct. Please be aware that detail can change and we encourage clients to update their technical records regularly via www.oand3.com/products/.

The information is not and should not be considered a guarantee or warranty, or a part of our contractual or other legal obligations. It is the ultimate responsibility of the client to pre-approve & assess the safety and suitability of the listed ingredient before use in any final formulations. We encourage carrying out additional tests if necessary. The information is not to be disclosed to others, reproduced or transmitted in whole or in part without permission from O&3.
