Skin Benefits

Hydrogenated palm oil is not commonly used in skincare or hair care products due to its solid consistency. However, it is used in some cosmetics formulations as an emulsifier or texture enhancer.

Functionality

Easily-Absorbed

Quickly absorbs into the skin without leaving a greasy residue. Lightweight and ensures fast penetration, delivering essential nutrients and hydration for a smooth and nourished complexion.

Hair Benefits

Boost the texture and conditioning of your hair products with Hydrogenated Palm Oil, contributing to a creamy and smooth consistency.

Emollient

Softens and smooths the skin, creating a protective barrier that locks in moisture. It is particularly beneficial for dry, rough, and chapped skin, providing deep hydration and improving the skin's texture.
